## POPULATION.

### DEFINITIONS AND EXPLANATION OF TERMS.

**Alien.**—According to census classification, any foreign-born person who has taken no step toward becoming an American citizen.

**Colored.**—Negroes, Indians, Chinese, Japanese, and "all other." "All other" comprises Filipinos, Hindus, Koreans, Hawaiians, Malays, Siamese, Samoans, and Maoris.

**Continental United States.**—Comprises the 48 states and the District of Columbia.

**Country of birth of foreign-born white.**—Because of the many political changes which have resulted from the World War, the 1920 statistics on this subject are presented on the basis of the postwar map.

**Country of origin of foreign white stock.**—Based upon the country of birth of the father of a foreign-born person or the foreign parent or parents of a native. Statistics are presented on the basis of the prewar map.

**Dwelling.**—A dwelling, for census purposes, is a place in which one or more persons regularly sleep. It need not be a house in the usual sense of the word, but may be a hotel, boarding house, institution, or the like. A boat, a tent, a freight car, or a room in a factory, store, or office building, although occupied by only one person, is also counted as a dwelling, while, on the other hand, an entire apartment house, although containing many families, constitutes but one dwelling.

**Family.**—The term "family," as used in the census, signifies a group of persons, whether related by blood or not, who live together as one household, usually sharing the same table. One person living alone is counted as a family, and, on the other hand, all the occupants and employees of a hotel, boarding house, or lodging house, if that is their usual place of abode, and all the inmates of an institution, however numerous, are treated as constituting a single family.

**Foreign born.**—Comprises all persons not born in the United States or any of the outlying possessions or at sea under the United States flag.

**Foreign parentage.**—Refers to persons having both parents foreign born.

**Foreign white stock.**—Comprises three classes, namely, foreign-born whites, native whites of foreign parentage, and native whites of mixed parentage.

**Illiterate.**—The Census Bureau classifies as illiterate any person 10 years of age or over who is unable to write in any language, not necessarily English, regardless of ability to read.

**Mixed parentage.**—Refers to persons having one parent native and the other foreign born.

**Mother tongue.**—The language of customary speech in the homes of immigrants prior to immigration.

**Native.**—Refers to persons born in continental United States, in any of the outlying possessions, or at sea under the United States flag.

**Native parentage.**—Refers to persons having both parents native.

**Outlying possessions.**—Alaska, American Samoa, Guam, Hawaii, Panama Canal Zone, Philippine Islands, Porto Rico, and the Virgin Islands of the United States. Detailed statistics regarding the population of the outlying possessions, except the Philippine Islands and the Virgin Islands, have been published in the form of separate bulletins and as sections of Volume III of the Fourteenth Census Reports.

**Philippine Islands.**—Not enumerated in 1920, a census of the Philippines having been taken by the Philippine government as of December 31, 1918.

**School attendance.**—The Fourteenth Census inquiry was as to whether the person enumerated had attended school, college, or any kind of educational institution at any time between September 1, 1919, and the census date, January 1, 1920.

**Urban and rural.**—All incorporated places (and all towns in Massachusetts, Rhode Island, and New Hampshire) having 2,500 inhabitants or more are treated as *urban* and the remainder of the country as *rural*.

**Virgin Islands of the United States.**—Not enumerated in 1920, a special census having been taken by the Census Bureau as of November 1, 1917.

TABLE 5.—POSITION OF THE CENTER OF POPULATION: 1790-1920.

[The center of population may be said to represent the center of gravity of the population. If the surface of the United States be considered as a rigid level plane without weight, capable of sustaining the population distributed thereon, individuals being assumed to be of equal weight and the plane to be supported, as on a pivotal point, at its center of gravity, the influence of each individual in maintaining the equilibrium of the plane would be directly proportional to his distance from the pivotal point or center of gravity. This is the point referred to by the term "center of population."]

<sup>1</sup> The total number of places of certain classes for the United States as a whole is less than the sum of the numbers shown for the individual states of the country, for the reason that each of three cities lies in two adjoining states, namely, Bristol (Virginia and Tennessee), Texarkana (Arkansas and Texas), and Union City (Indiana and Ohio), and is counted in each state. Moreover, one of these cities, Bristol, lies in two geographic divisions (South Atlantic and East South Central), and is counted in both. Each of these cities consists of two incorporated municipalities, but each is, from the statistical standpoint, one city and should be classed according to its total population. In each case that part of the population living in each state, whatever its number, is credited to the group of cities to which, according to its total population, the city belongs. Classed in this manner, Bristol fell in 1920 and 1910 in the class of cities having 10,000 to 25,000 inhabitants, and in 1890 and 1900 in the 5,000-10,000 class; Texarkana fell, in 1920, 1910, and 1900, in the 10,000-25,000 class, and in 1890 in the 5,000-10,000 class; and Union City fell at each census from 1890 to 1920 in the 2,500-5,000 class.

<sup>2</sup> Includes 48 places not returned separately.

<sup>3</sup> The number of incorporated places can not be exactly determined from the returns of the 1890 census, at which incorporated places were not distinguished from unincorporated ones, and very small places, whether incorporated or not, were not enumerated separately. It has been assumed that those places were incorporated in 1890 which were returned separately in that year and were returned in 1900 as incorporated. (See Reports of the Twelfth Census: 1900, Population, Vol. I, p. lviii.) The figures given for 1890 in this table for incorporated places having fewer than 2,500 inhabitants may, therefore, include the population of some unincorporated places and exclude that of some incorporated places.

TABLE 18.—AREA AND POPULATION OF CENTRAL CITY, METROPOLITAN DISTRICT, AND ADJACENT TERRITORY, FOR CITIES OF 200,000 INHABITANTS OR MORE: 1920 AND 1910.

[A metropolitan district has as its nucleus a city of 200,000 population or more and includes in addition those suburban areas which lie within approximately 10 miles beyond the municipal limits and in which the density of population is 150 per square mile or more. The adjacent territory is the total suburban territory, regardless of its density of population, which lies within a distance of approximately 10 miles beyond the limits of the central city.]

[Population shown for central cities for each census year does not include that of annexations made subsequently to census date, but total population given for each district for 1920 and 1910 relates to same area.]
